

Galvanized Roll Formed, Framed Baffle Grease Filters

- **Unique, roll formed baffle designed to prevent flame penetration into duct work**
- **Sturdy design is made of two layers of baffles, strategically placed to allow grease laden air to swirl, adhering the grease to the baffles themselves**
- **Grease drains down the baffles into a trough, where it can be easily wiped away**
- **Each baffle “pad” is supported by a solid metal frame, securely riveted to one side**
